

# VAX TO THE FUTURE!

Vaccines help your body fight off germs and keep you healthy by teaching it how to stop sickness before it starts. When you get a vaccine, you're protecting yourself and others from harmful diseases. So, get your vaccine and be a superhero for your health and the people around you!

Safety

Vaccines keep you  
and your friends safe.  
What other things can  
you do to keep your  
community safe?

**Down:**

1. The second dose of a vaccine to make your protection even stronger.
3. A helper in your body that helps fight off infection.
4. Tiny germs that can make you sick if they spread.
6. A tiny germ that needs a host and can make you sick.

**Across:**

2. A shot that helps prevent you from getting sick.
5. When your body learns how to fight a disease effectively.
7. A person who helps keep you healthy and treats you when you get sick.
